

Mystical Teaching Opportunities through the Next Practice Institute

Mystical Teaching Circles with Thomas Huebl

Unlike the one-on-one healing sessions and supervision groups we offer together, this is not a personal process group. It is designed to support a consciousness development and awakening path for transformational practitioners.

In these circles, we study mystical text, receive light and other grounding meditation practices. Thomas offers teaching on the incarnational process, creation mechanics, death and dying, reincarnation, restoration and cultural architecture and mystical healing.

The Healing Power Of Family/Systemic Constellations with Applied Mystical Principles with Ester Martinez

This intimate workshop is highly engaged and offers a deep healing cauldron for each participant and their family, whether participating in the constellations of group members or being chosen to undertake your own family constellation. The field is one of alignment, inclusion, and love and powerful in its ability to offer a restorative impulse back in time to our ancestral lineage.

In this session Ester will share the main revelations articulated by her teacher Bert Hellinger as the “Orders of Love” and integrate them with her own embodiment of mystical principles for healing to help participants expand their understanding of the alchemical transformational process, access their own wider healing, and cultivate myriad subtle competencies.

Invoking A Renaissance for Humanity: A Retreat of Mystical Teaching, Practices and Initiations with Patrick Connor

Patrick guides students through a systematic and comprehensive illumination process that is very rare and profound. His work includes a precise clearing of the karmic storehouse in the sub-conscious mind that shapes and contours the events of our lives and a transmission process that inducts descending light into one's field and opens the chakra/ energy system to higher vibrations and an initiation process that reconfigures and upgrades and rewires the etheric body to hold more and more of the light of unity consciousness.

This process, in turn, elevates the quality of one's presence and lifts the frequency of magnetism from which one is operating. Further it brings one into much closer direct contact with higher realms and helps the aspirant to integrate the mystical and human dimensions of their life in a complete way.
